

José Escrich

Senior Software Developer Software Architect / Cloud Specialist

I'm a code and quality passionate senior software engineer with more than 20 years of experience, working close to clients and their business needs, focusing on user experience, usability and adding value to their business.

I have strong experience managing multiple small to medium teams (on site and off shore). I feel very comfortable with multitasking and I can wear multiple hats at the same time, seamlessly switching from highly technical problems to business related problems.

I'm constantly looking for new challenges to learn, grow and use my potential and experience. I enjoy meeting new people and places, understand different cultures and reinvent myself in the process.

Activities

I'm a passionate person who like to learn new technologies on different fields and doing different exiting things. Apart of my rol as a Software Engineer I spent my time doing

- I'm a SKI certified instructor and a passionate mountain activities.
- I've created a Foundation (Fundación RESILIENCIA) with my wife to help patients with Epilepsy.

- I like create Arduino devices:
 - o As a part of my Foundation I developed bodysuit with acelerometers, oximeter sensor, heart rate sensor and fall sensor to help on prevention of seizures on babys.
 - o As a part of my Ski activity, I'm developing a bodysuit with sensors to get ski ride telemetry, body positions, tensions, G-force to help athletes to improve his performance.
- I like to ride motorcycles, I have few 😊, I usually assist to MotoGP events.
- I like to drive 4x4 vehicles in extreme conditions, I also have self made 4wheel trucks.
